

An illustration of a rainy street scene. In the foreground, a young boy in green shorts is running through a puddle, splashing water. To his left, another boy in red shorts is walking. In the background, a girl in a pink shirt and blue shorts is standing under a blue umbrella, looking at a white car. The scene is filled with vertical rain lines and splashing water.

WORLD WATER DAY 2022

VALUING WATER

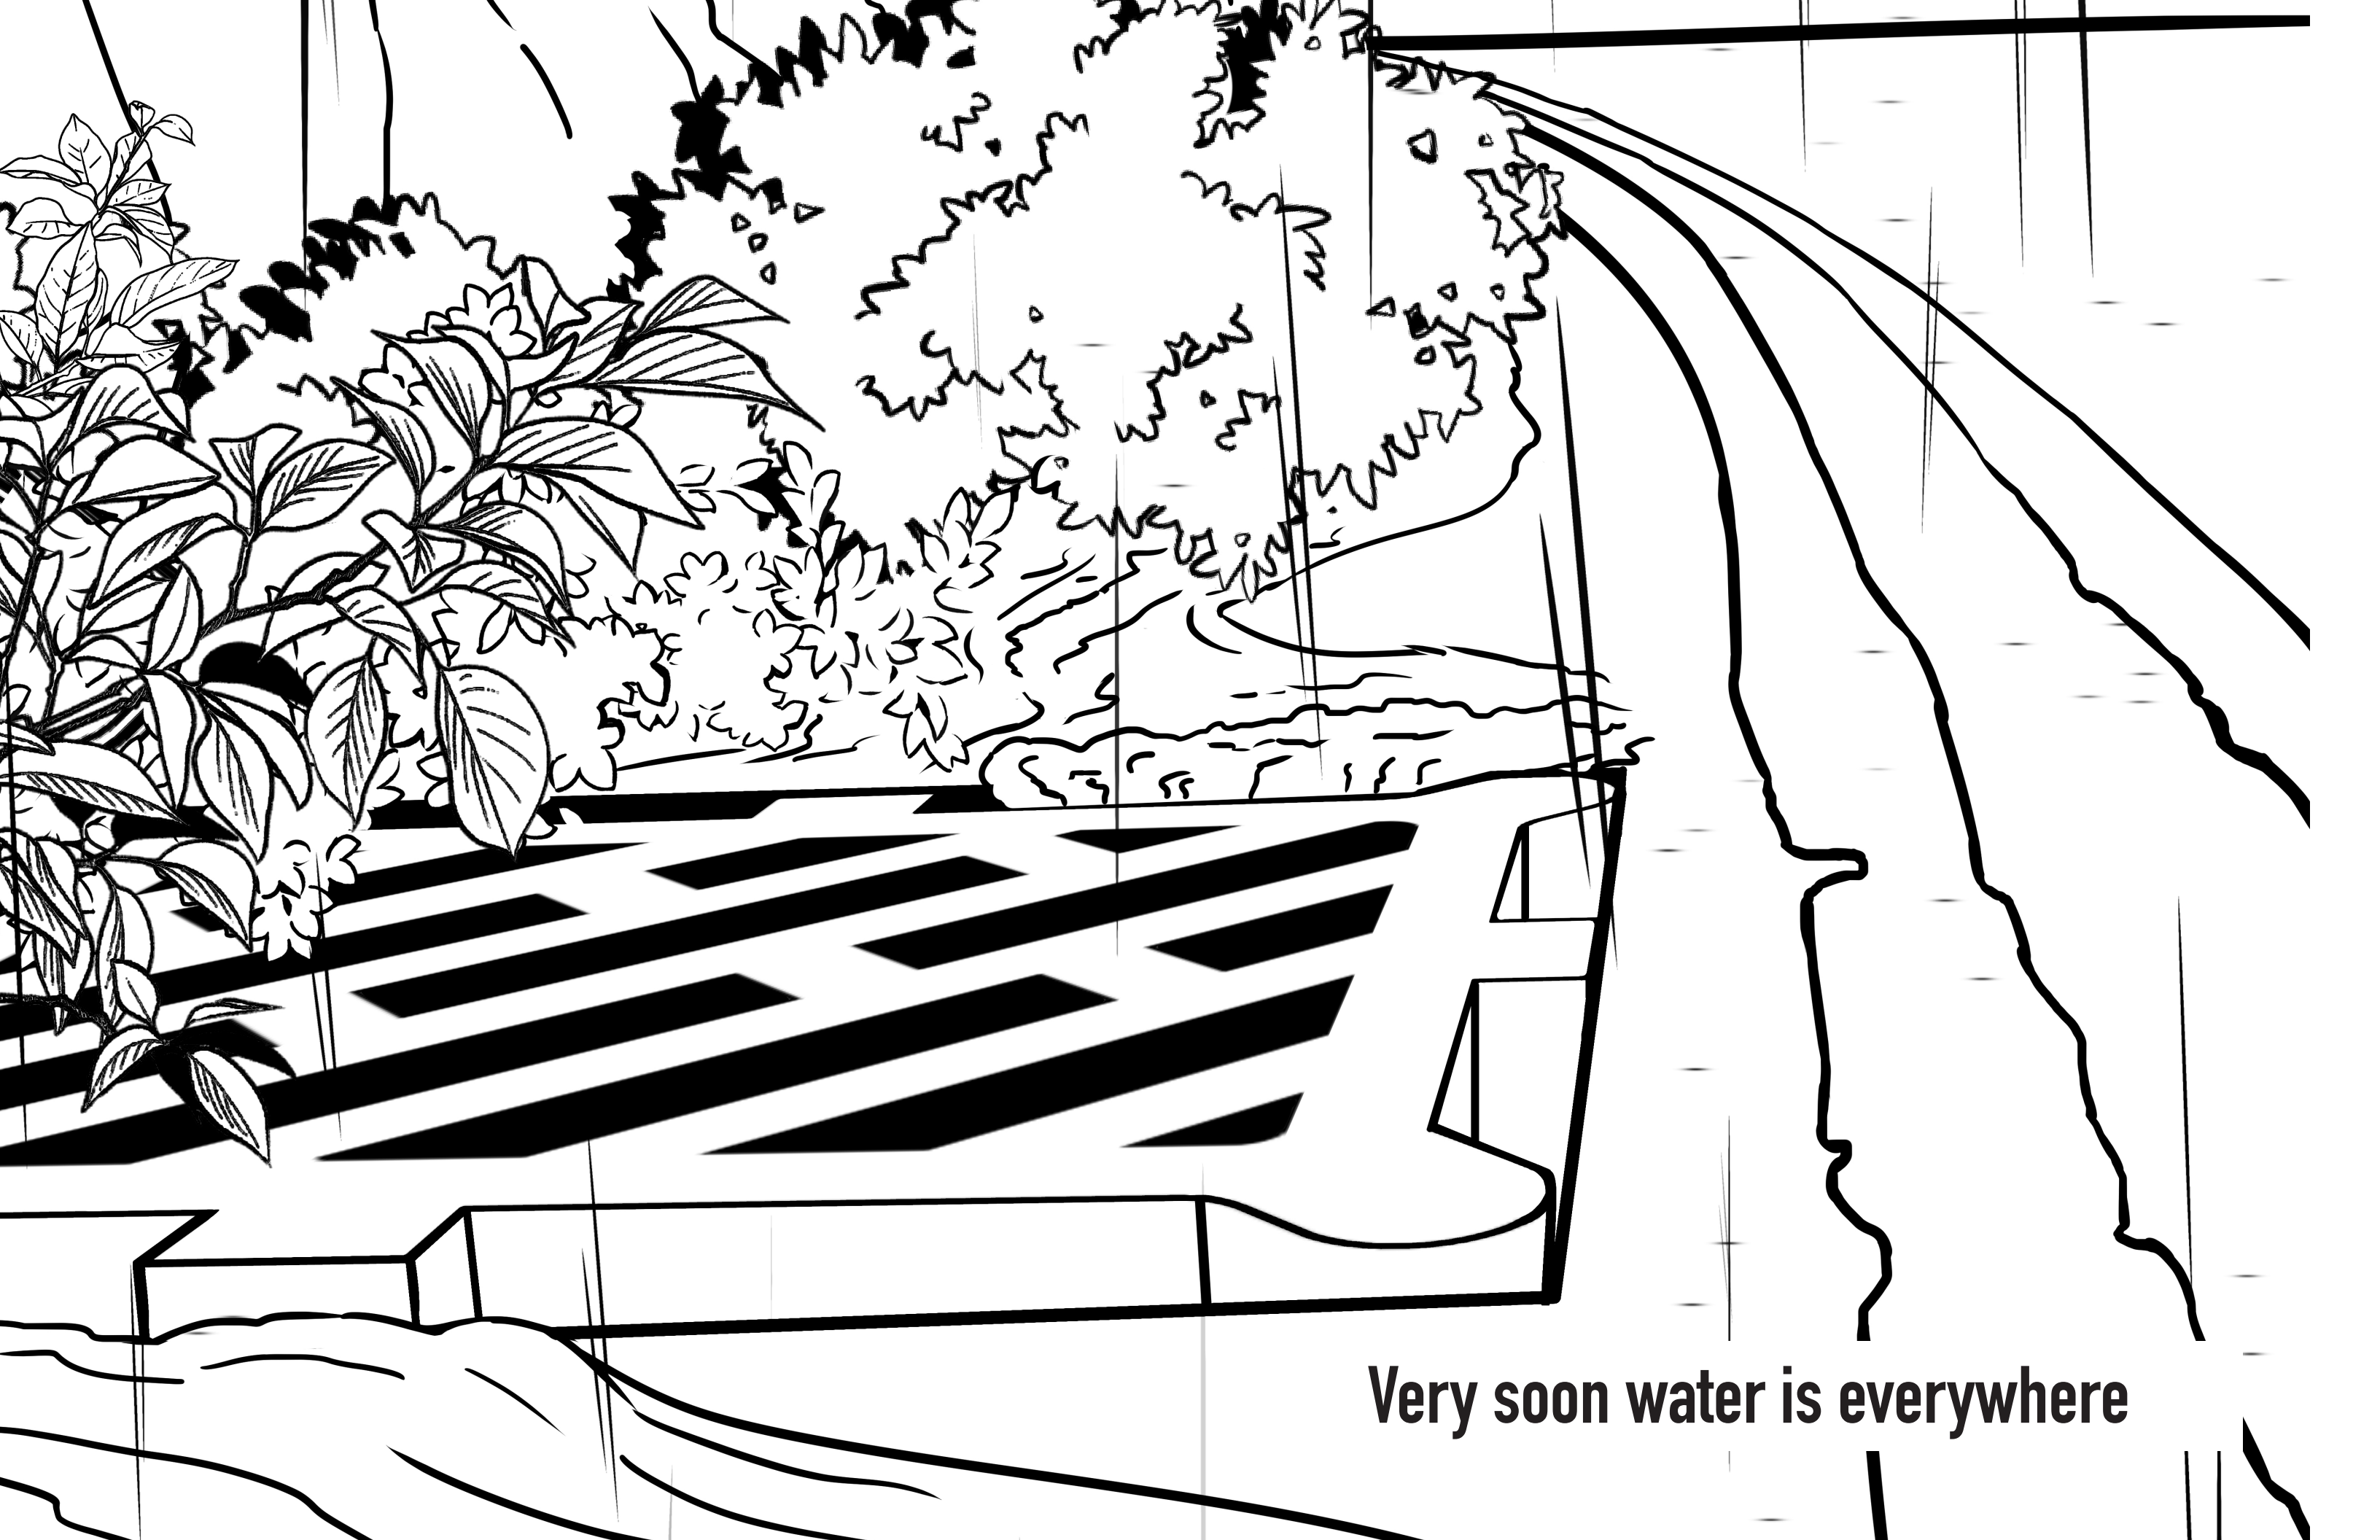

**Mom, where does
this water
come from?**

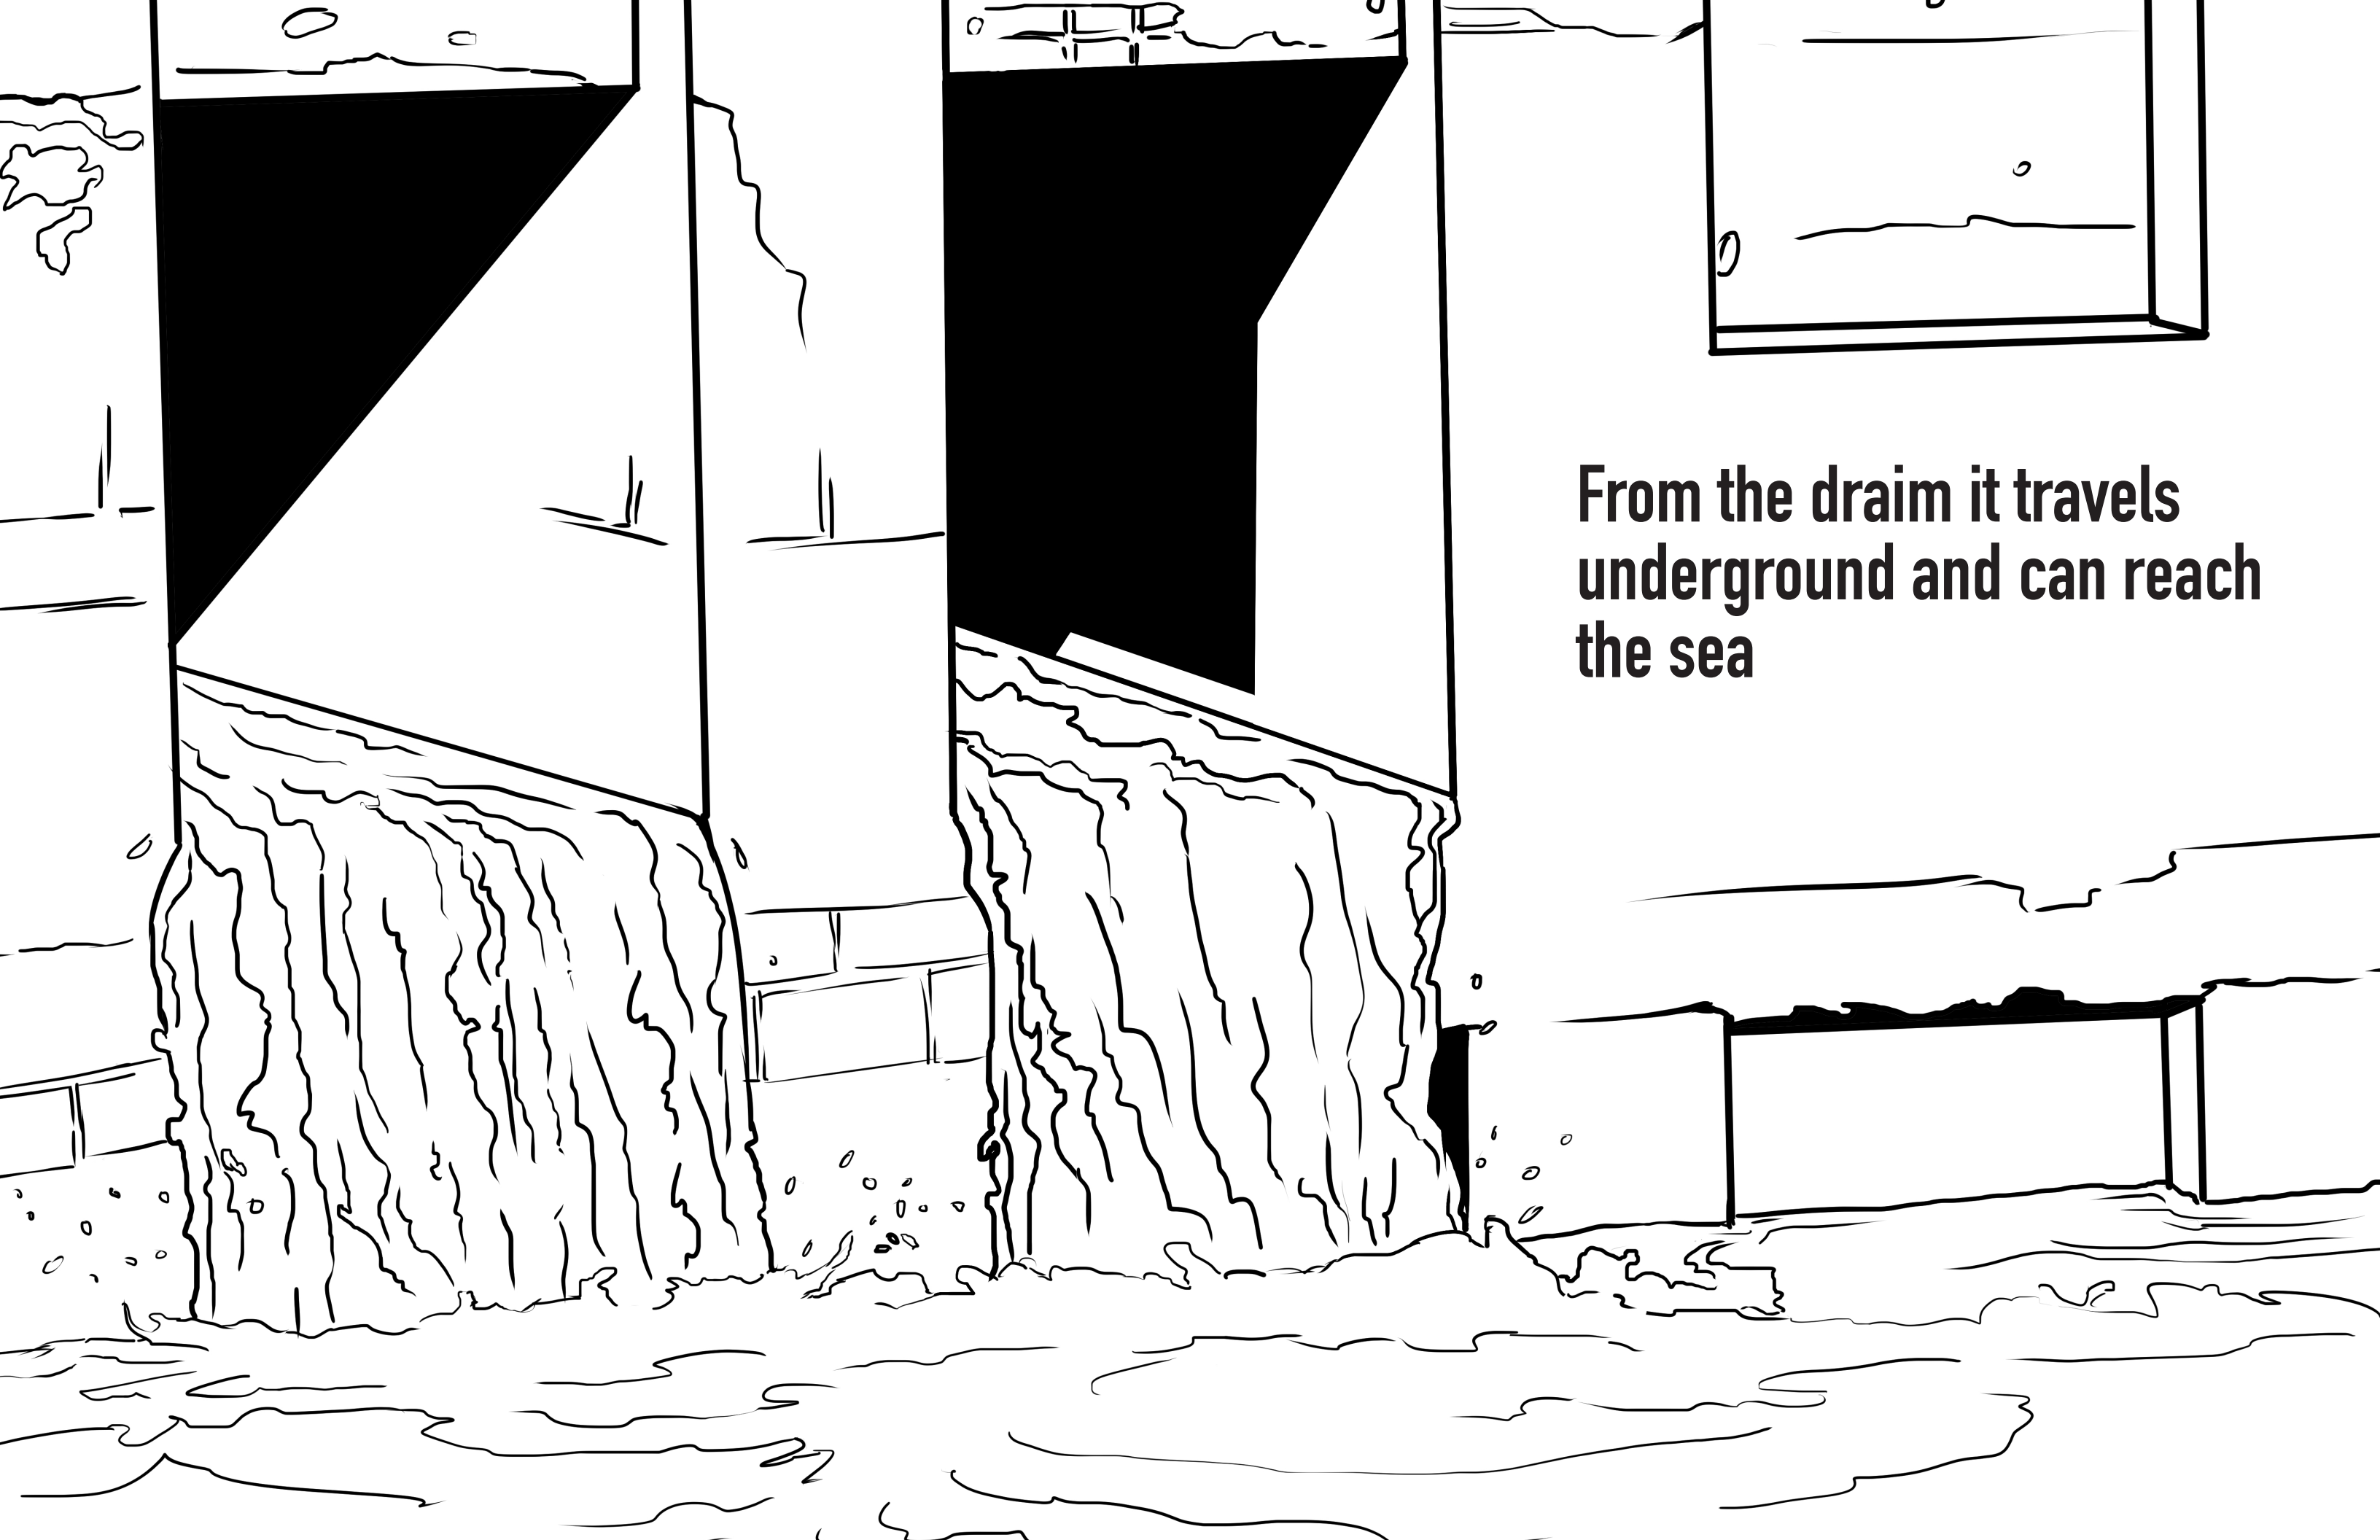

First we get lots of rain!

Very soon water is everywhere

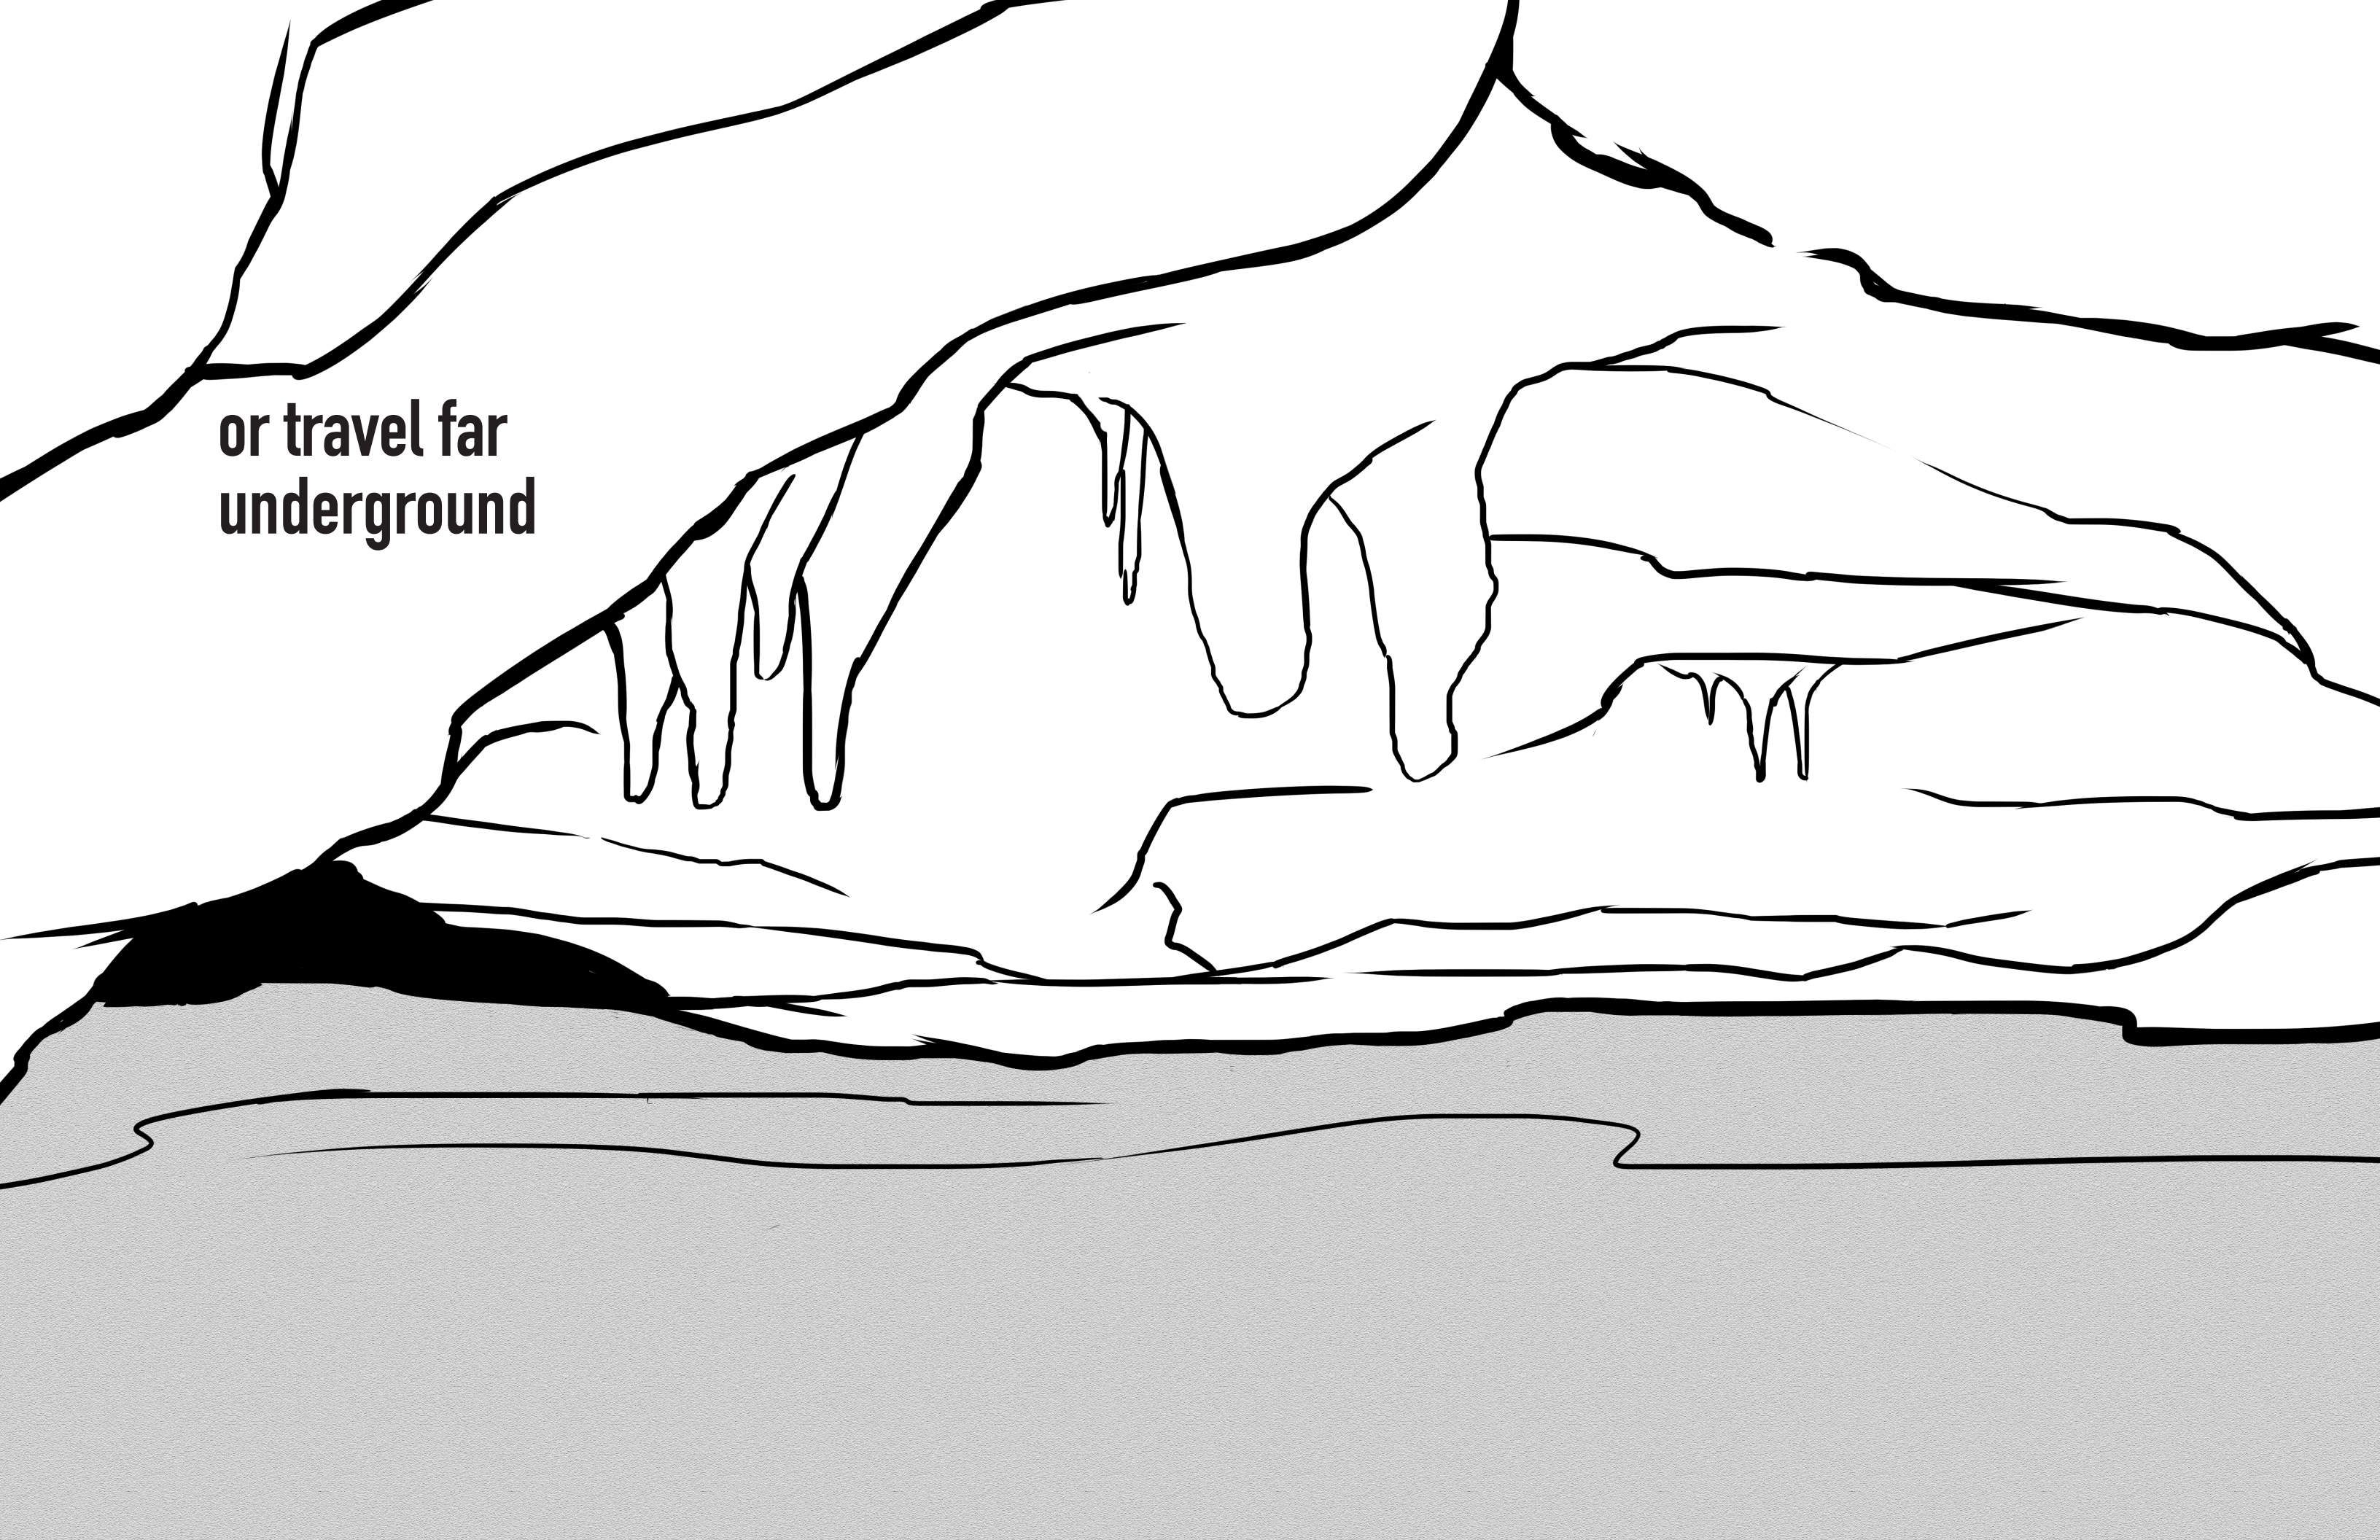

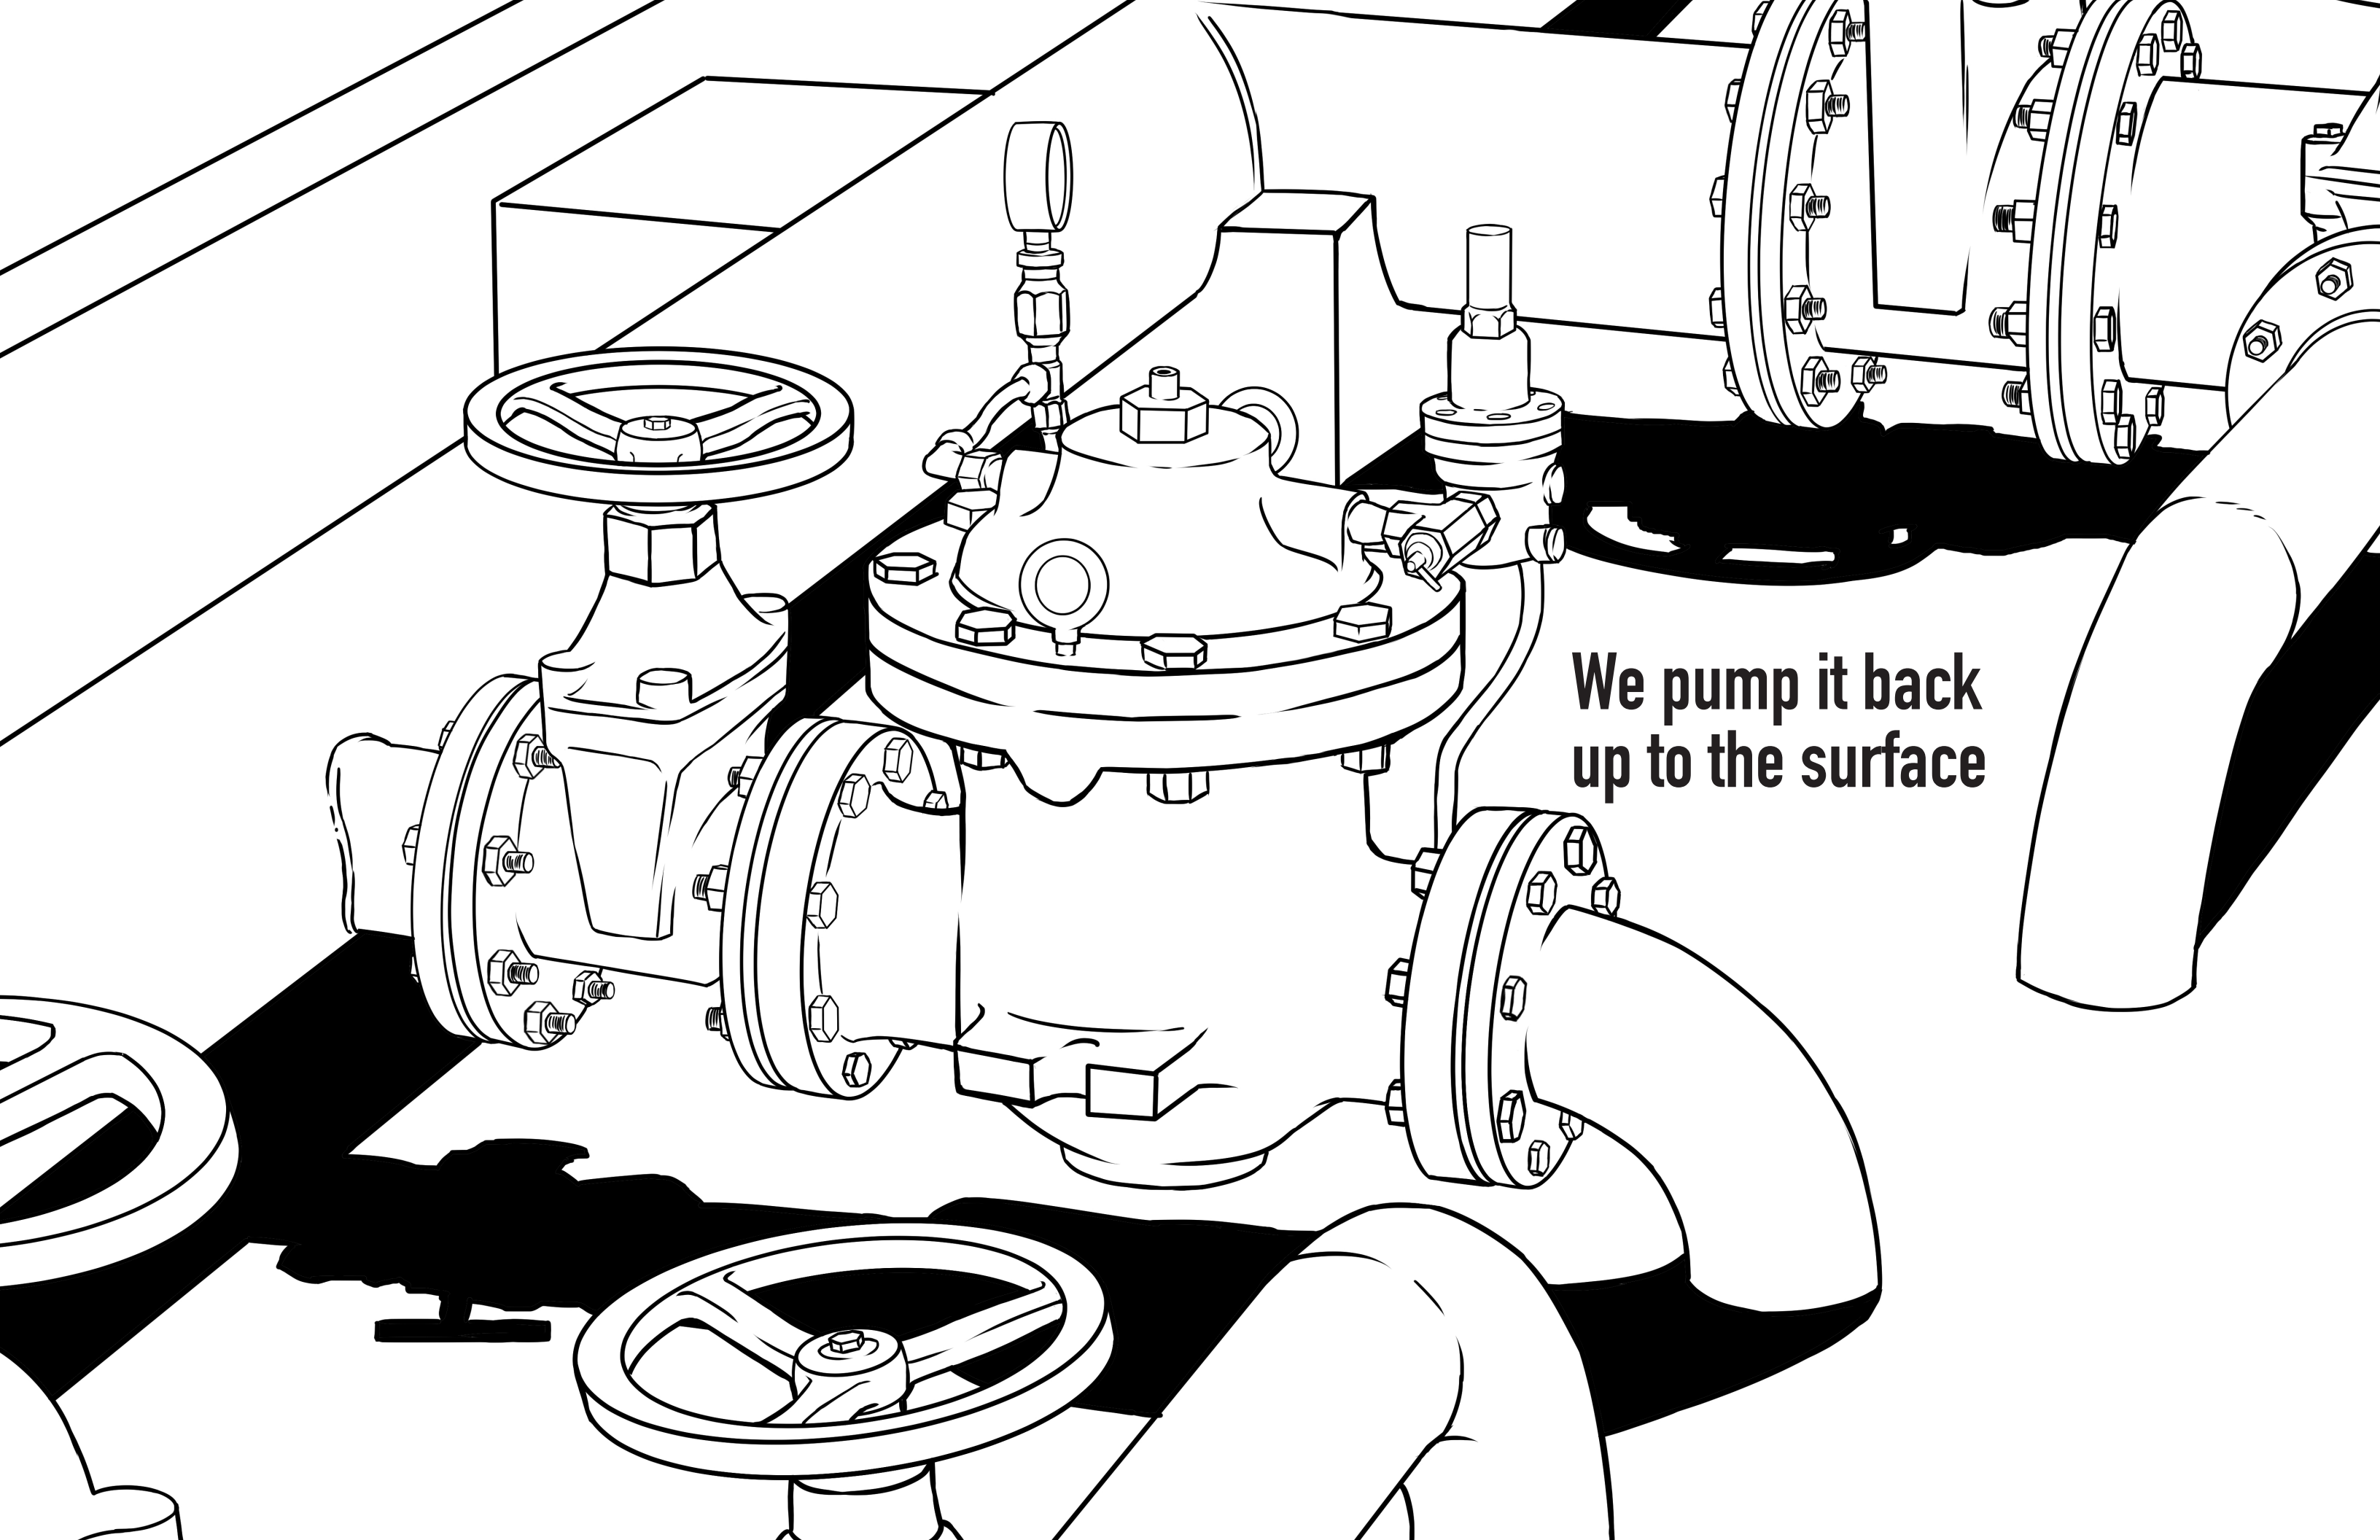

**From the drain it travels
underground and can reach
the sea**

**The water can make it to
rivers and streams nearby**

**or travel far
underground**

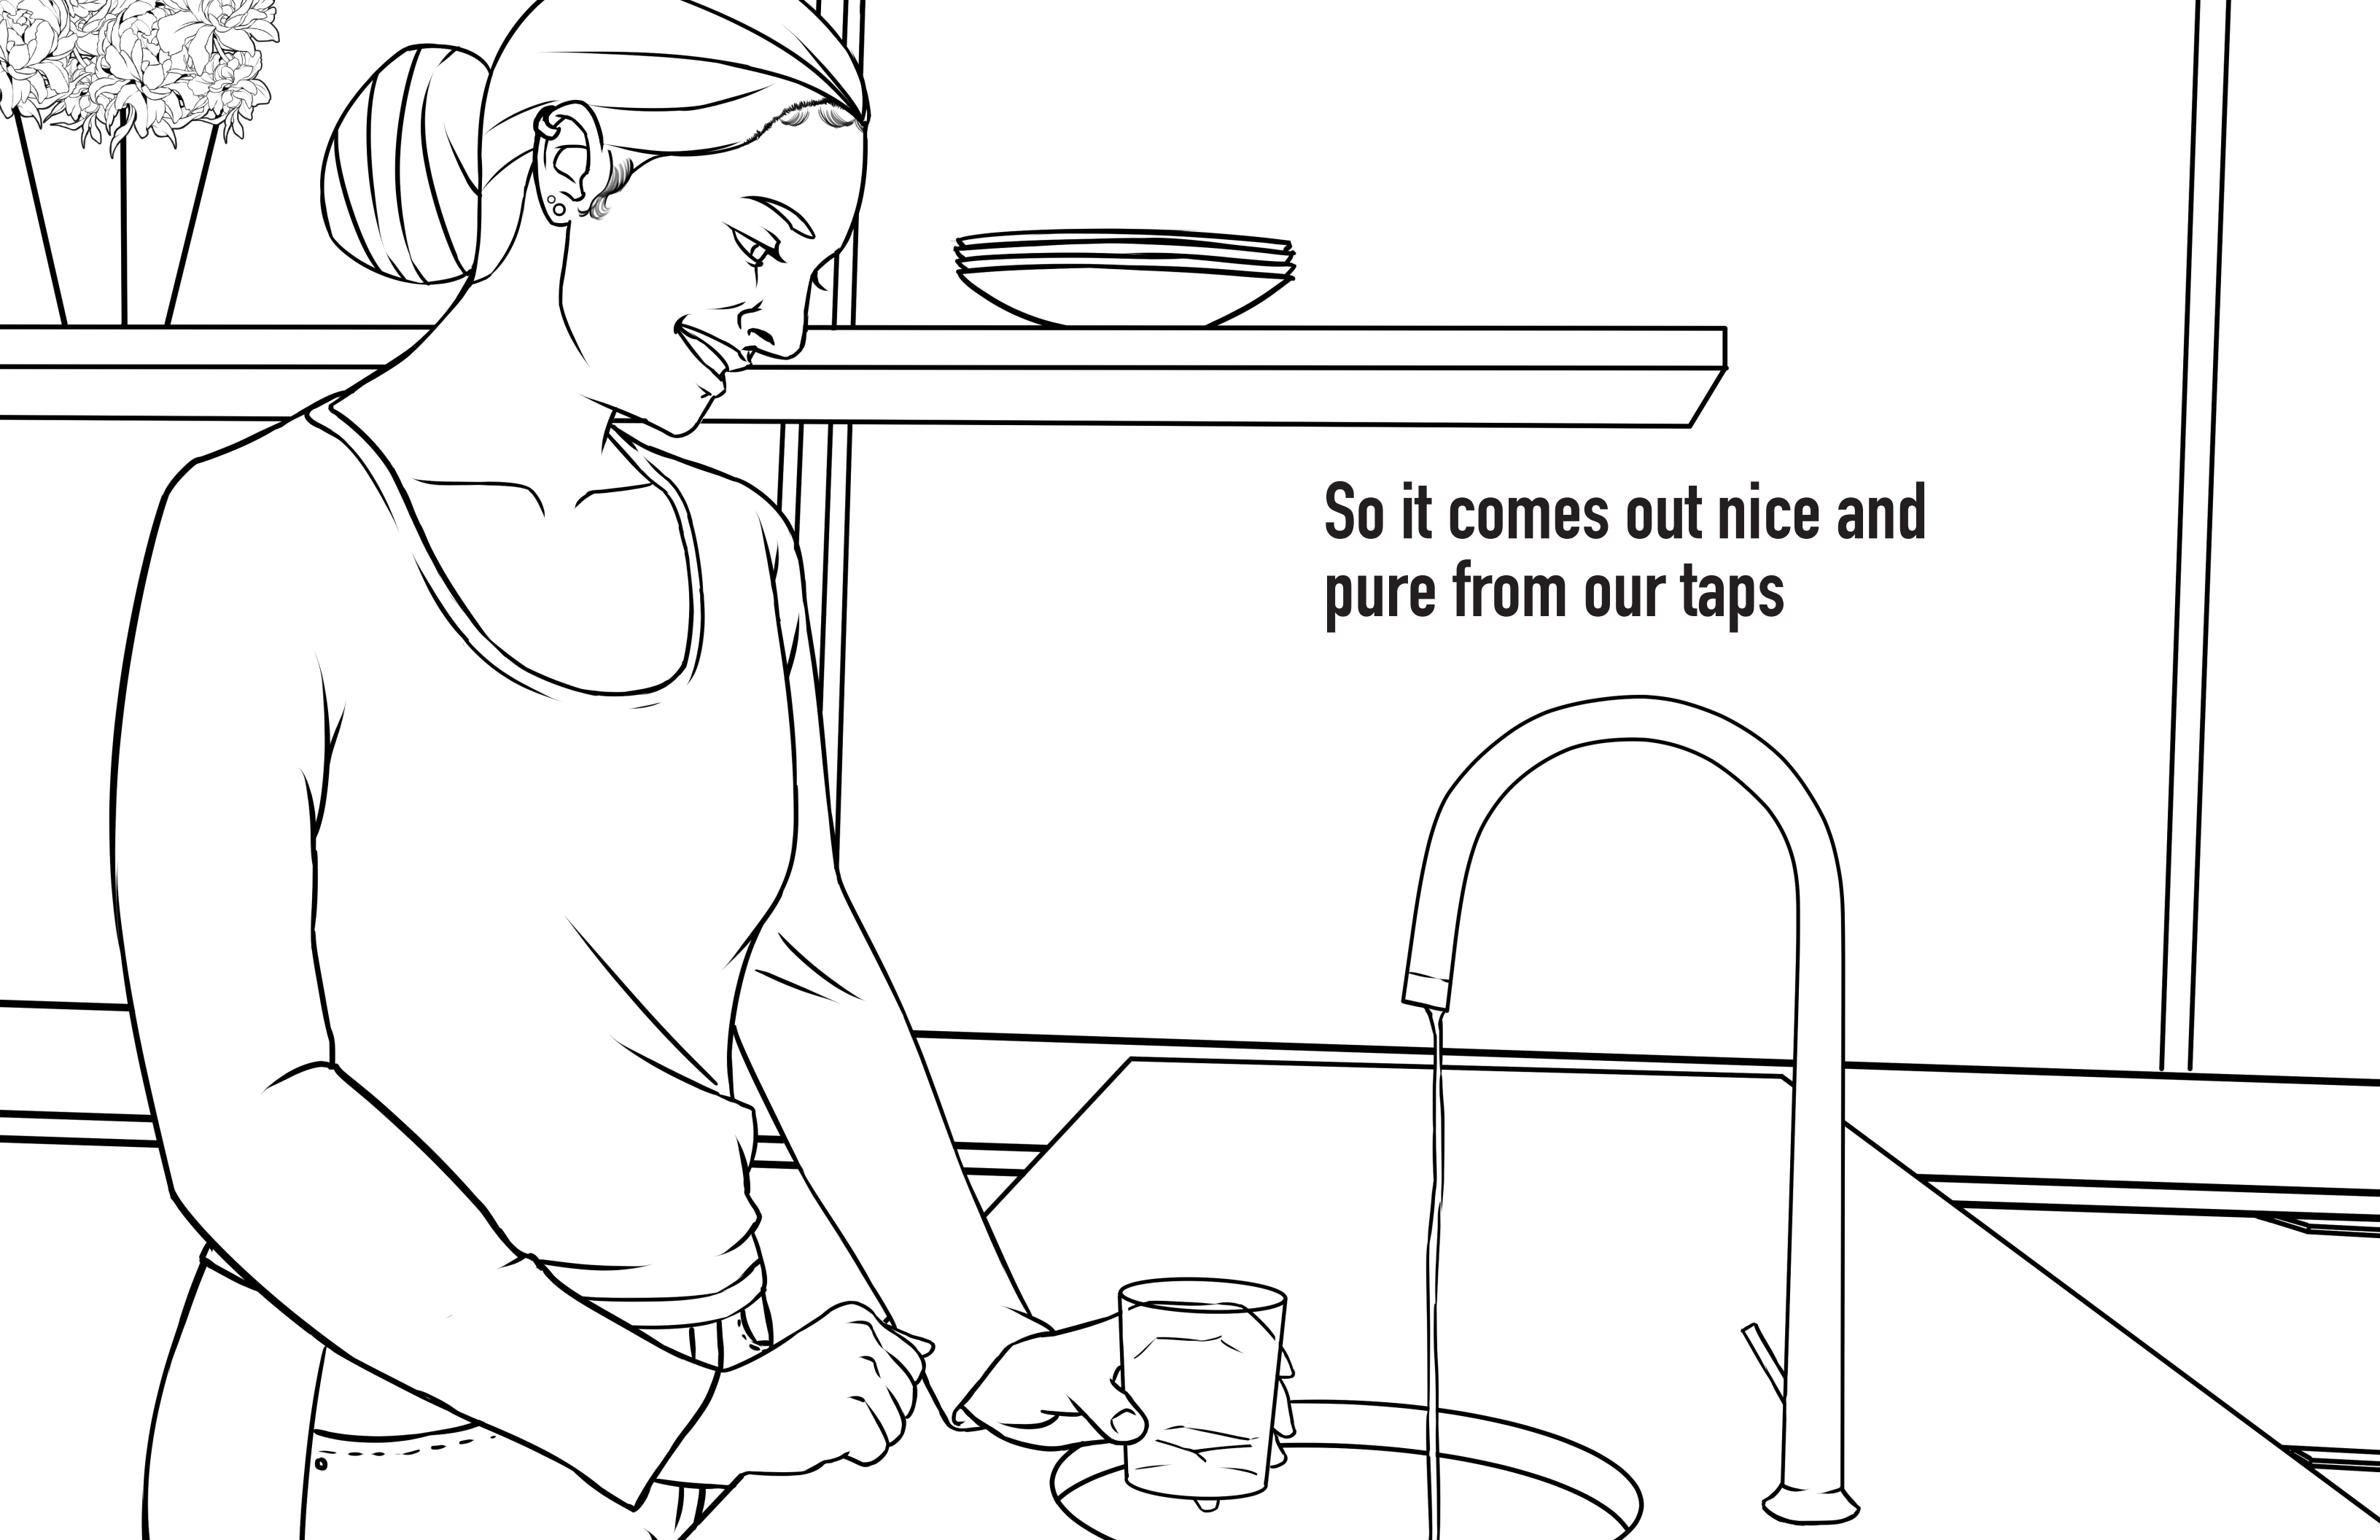

**We pump it back
up to the surface**

**The we clean it and
store it in large resivoirs**

**So it comes out nice and
pure from our taps**

**Clean water is
good for all of us.**
