## **JOIN US IN CONGRATULATING!**

*Mrs. Chalsey Anthony*

Communications Assistant – Caribbean Community Climate Change Centre

The Executive Director, Dr. Colin Young, on behalf of the Board of Directors, Management and Staff of the Caribbean Community Climate Change Centre wish to extend congratulations to our very own Chalsey Anthony on the occasion of her dissertation topic being accepted and approved.

Mrs. Anthony has been furthering her studies to be better equipped to advance the climate change fight.

Her research proposal is titled “*A Qualitative Study into the Role of Caribbean Climate Journalism in Communicating Climate Change: A Focus on the Emerging Patters and Habits and their Potential to Influence Attitude and Behaviour Change*”

This great news allows Chalsey to do conclusive research on how prominent and trusted sources add value to the transmittal of climate change information.

Chalsey is expected to graduate with a Master of Arts in Mass Communication from Liverpool John Moores University in April 2023.

We look forward to celebrating with her then!
